

## Public Meeting for Matthew's Beach Play Area Renovation Magnuson Park Community Center, December 11, 2009

### Comments for Play Area

- Provide climbing walls and rocks;
- Two separate areas for each age group's play;
- Likes Annie's play ground because it's easy to watch both age groups;
- Likes synthetic surfacing;
- Connect play areas, combine both age groups;
- Construct a sand 'box' at shoreline;
- Provide a bouncy car play piece;
- Provide more swings;
- Remove spring toys, too much maintenance
- Provide a play house;

### Comments for Plaza/Picnic Area

- New pathway should be of permeable surfacing;
- Design #2 because plaza/barbeque area is separate from play area;
- Likes Design 3 and would like plaza area to include a picnic shelter;
- Provide a sign to slow down bicycles through the park.

### Comments for Basketball

- Provide a short basketball hoop;
- Keep Basketball court as is;

### Preferred Design:

- Pathway located east of the trees and play area, with a separate picnic area.
- Another plaza area created within the play area so that better visibility is achieved throughout the play area and to the beach.
- Some existing play equipment needs to be removed (climbers).
- Retaining wall will remain. The curbing within the play area will be removed to provide for better accessibility.
- Existing sand will be replaced with safety surfacing.
